

Do-It-Yourself Seed Strips

- 1) Mix 1 Tbsp cornstarch for every 1 cup water in a small pot.
- 2) Bring to boil while stirring.
- 3) Pour warm liquid into squeeze bottles (ie: empty ketchup bottles available from the dollar store or other outlets).
- 4) For best results, use shortly after making while it is still warm. If it is too hot, it will be too liquid. If it is too cold, it tends to clog.
- 5) Squeeze the cornstarch onto toilet paper strips, spacing the dots according to directions on the seed package.
- 6) Add the seeds.
- 7) Fold the paper in half and let dry.
